

## Contactless Exit Button

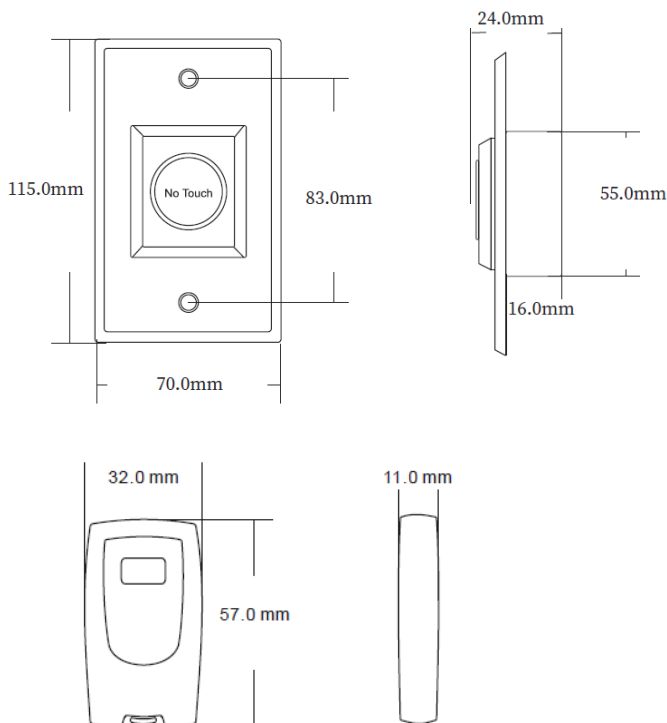

### ACCESK1LTR

ACCESSPRO contactless exit buttons use IR technology to identify the exit. It is only necessary to approach the hand without the need to touch. This equipment is ideal for installations in schools, hospitals, offices or clinics.

#### Characteristic:

- Detection distance is 4 to 15 cm adjustable.
- No contact reduces the risk of cross contamination.
- NO/COM/NC output contacts.
- Stainless steel plate.
- IR sensor.
- Relay output timer.
- Led illuminated in identification area. Blue/Green.

#### Dimensions:

#### Specifications:

Parameters	Description
Operating voltage	12VDC / 24VDC
Panel Material	Stainless Steel
Withstand current	24VDC@3A Max
Operating temperature	-20 to 55°C
Timing time	0/3/6/9 sec.
Supported transmitters	16 transmitters
Weight	0.16 Kg.
Mechanical life	500,000 actuations
